

Vieux-Patriotes La Chaux-de-Fonds

The architecture of these two boldly contemporary buildings fits into a spirit of dialogue and complementarity with existing neighbouring buildings while asserting their own identity. The two upper floors are set back to provide spacious west-facing terraces. Floor plans are both rational and functional and offer generous space. The buildings have three levels plus an attic. Each flat offers a smooth-flowing living area – open kitchen, dining room, living room, terrace or balcony. The generous spatial dimensions are accentuated by the creation of a long strip of panoramic windows bringing in natural light and opening up a clear view out over the surrounding landscape.
